

**Makes the world
look better.**

General information

Materials & warranty

Grigio – Grigio Metallic – Terreno – Bordo – Ruvido – Stretto

Materials

- The planters in these series are made of a unique material composition based on fiberglass. This makes the products:
 - Frost-resistant
 - UV-resistant
 - Lightweight
- All products feature a drainage hole and integrated feet. This ensures that water can flow unimpeded from the planter.

Warranty

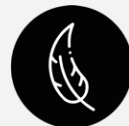

- We provide a 5-year warranty on all products in these series.
- Our high-quality planters are made by hand. Because of this production process and the use of different materials, each planter is unique. It cannot be ruled out that minor colour differences may occur.
- Proper planting and unimpeded drainage of water when used outdoors are prerequisites for the warranty.
- Our planting instructions can be found on the next page.

Planting

Grigio – Grigio Metallic – Terreno – Bordo – Ruvido – Stretto

Outside

- **Drainage holes**
Ensure that excess water can drain unhindered from the planter by means of a drainage hole. Depending on the size of the planter, holes are already pre-drilled. If more holes are required, this can easily be done using a stone or steel drill bit. The number of holes that needs to be drilled in the planter depends on the type of planting and the size of the planter.
- **Filling**
The drainage holes in the base should always be kept clear. This can be done by filling the bottom of the planter with clay pebbles, covering with root-proof membrane and then filling with soil. Integrated feet under the planter allow water to drain away.

Shapes that feature a removable bottom at 35 cm depth: High Cube, Divider & Vase.

Indoors

- All our planters come with a rubber plug to seal the drainage hole. However, we recommend always using an insert sleeve as well for indoor use.
- The flexible insert sleeves guarantee waterproof planting:
 - Available in both round and square shape
 - Available in various sizes
 - Flexible material allows the cover to be shaped and cut to the desired height
- The planters are handmade, so we cannot guarantee that they are watertight when used without an insert sleeve.

Cleaning & maintenance

- After purchasing the planter, it should be unpacked as soon as possible so that
- moisture damage is prevented.
- We recommend simply cleaning with lukewarm water and a soft brush.
- Do not use harsh cleaning agents, a high-pressure cleaner or a hard brush.
- For heavier soiling, mild detergents can be used.
- We do not recommend moving a fully filled planter. Planters with wheels can be moved, of course.
- Minor damage can be repaired by using our repair kit. This is available in any colour upon request.

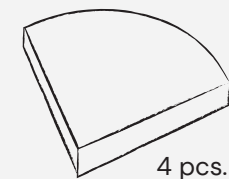

Extra

- Sample plates and/or mini pots of all colours/structures from the Luca Lifestyle collection are available upon request.
- Please note that there may be minimal differences in colour between these samples and our products. All products are handmade and therefore unique.

Potfeet

To ensure extra good drainage, a set of pot feet can be placed under the planter. These are available in three different colours, providing a matching set of pot feet for every planter.

Materials, warranty, planting & maintenance

Marrone

Materials

- Our Marrone collection consists of products made of recycled wood.
- The products are treated in such a way that they are suitable for both indoor and outdoor use.
- All Marrone planters feature inset containers made of recycled plastic.

Warranty

- We offer a 3-year warranty on all products in the Marrone series.
- Our high-quality planters are made by hand. Because of this production process and the use of natural materials, each planter is unique. It cannot be ruled out that minor colour differences may occur.

Planting

- Depending on the size of the planter, it may have one or more inset containers.
- The inset containers are made of recycled plastic and are waterproof.
- The inset containers are easily removable, making them easy to plant up.

Maintenance

- All our Marrone planters are treated to resist weathering.
- To maintain the original colour, we recommend treating the planter with teak oil (Marrone Natural) or black paint suitable for outdoor use (Marrone Black).
